## Malaysian oil palm biomass waste: Concern and Opportunities

**Mohd.  
Hazwan Hussin, PhD**

Associate Professor  
School of Chemical Sciences  
University Sains Malaysia

開催日

**2024. 6. 28. Fri.**

時間

**13:00 - 14:30 (3限)**

教室

**全学講義棟1号館403講義室**

The palm oil industry is known as the primary producer of biomass in Malaysia. The massive production of oil palm biomass has resulted in a significant waste disposal problem. The state of the palm oil industry in Malaysia also highlighted the potential of oil palm biomass in various industries and as a source of green energy. Oil palm biomass can be commercialized in a wide range of value-added products. In this talk we are going to share our experience on converting this "waste into wealth".
