International Competence in STEAM and its Impact on Society

Dr. Eduardo de la Fuente Acosta
(Departamento de Fisica,
Universidad de Guadalajara,
Jalisco, México)

May 9, 2025 Fri. 13:00 – 14:30 (3限)
Student Lecture Hall 1-206

In this talk, I will provide a contextualized perspective on how Japan's unique ability to combine a rich cultural heritage with modern innovation can shape both scientific and technological progress and cross-cultural collaboration based on a deep respect for tradition. The talk will highlight the intersection of STEAM and intercultural competence and how they are used in society to solve local problems.

**International students are also welcome
to attend this 'An introductory seminar'.**

Please feel free to join us!
